

- Frustrated with urinary incontinence?
- Tired of pads and panty liners?
- Lacking intimacy?
- Dryness / itchiness / painful intercourse / post menopause
- Missed work or social events due to incontinence?
- Wasting time to address intimate issues?

If you are nodding yes to any of the above sentences, you will most likely be a suitable candidate for Vaginal Rejuvenation. Did you know that the vaginal tissues are made of collagen and decreases over time as we age, resulting in loss of elasticity and laxity?

Reclaim your pre-baby body, restore your satisfaction, revive your relationship with Exilis Ultra Femme 360, done by female doctors only.

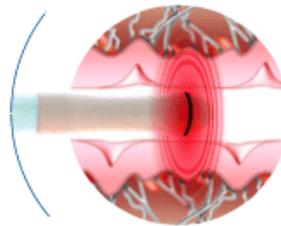

**How It Works?**

Exilis Ultra Femme 360 is a non-invasive procedure available to treat female's intimate health, including labial remodeling (labia reduction) and vaginal tightening with a single device. It uses the body's natural processes to stimulate collagen production and restore the vaginal and vulvar areas to a more youthful state. Using FDA-cleared radiofrequency waves energy, the revolutionary 360 design of the probe enables you to do this treatment in maximum comfort with uniform distribution of energy.

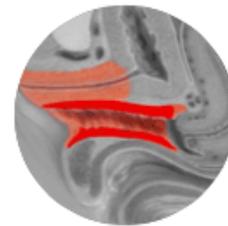

#### **BEFORE**

The tip is inserted through the introitus inside the vaginal canal, moving slowly alongside forward and backward.

#### **DURING**

Temperature and local circulation increase. This mechanism plays a crucial role in the target tissue.

#### **AFTER**

The heat helps restore women's intimate well-being without discomfort or downtime.

While the Exilis Ultra Femme 360 homogeneously heats the treated area, you will feel a pleasant and comfortable heat. The procedure tightens and raises the labia, decreases the diameter of the introitus (vaginal opening) and the vaginal canal, improves natural lubrication, improves sensation, and can make orgasm easier to reach. Many patients also experience an improvement in stress incontinence from the treatment.

Exilis Ultra Femme 360 causes no pain or discomfort, requires no anesthesia, and has no downtime. Following the treatment, you may notice mild redness and swelling in the treated area. This usually disappears within a few hours.

#### **Ideal Candidates for Thread Lifts**

- This procedure is a great option for women who desire non-surgical improvement of their intimate health.
- Exilis Ultra Femme 360 is clinically-proven safe and effective for vaginal tightening, labia remodeling and improvement of urinary incontinence.

# Women's Issues

Condition	Symptoms	Target patients	Target demands
Vulvo-vaginal laxity	Vulvo-vaginal looseness negatively affecting sex life	Post – partum women	Aesthetic, sexual enhancement
Stress urinary incontinence (SUI)	Urine leakage during increased abdominal pressure	All ages, but mainly post partum women	Quality of life, self confidence
Vulvo-vaginal atrophy (VVA)	Dryness, itching, burning, dyspareunia	Post-menopausal women	Quality of life, Sexual enhancement

## Treatment areas:

Rejuvenation of the vagina and entire vulvar and area including:

- Plumping of Labia Majora
- Lifting and firming of Labia Minora
- Tightening of Introitus (vaginal opening)
- Tightening of Vaginal Canal
- Tightening of Perinium
- Increased Blood Flow to Clitoris
- Increased Sensitivity & Improved Orgasm
- Improvement in Stress Incontinence

## How long is the treatment? How many do I need?

Vaginal Rejuvenation includes both internal and external intimate parts.

Intravaginal treatment takes 8 minutes. External treatment is based on your specific needs, and usually takes less than 12 minutes. It is an ideal treatment for those looking to do the procedure during their lunch break and want to return to work directly after. Recommended number of treatment sessions is 3, scheduled

once a week. It is also recommended to start the procedure 10 days (after) 1st day of menses.

**How fast will I see results and is there any downtime?**

Depending on an individual's lifestyle, most patients experience improvements after a single treatment. The results will typically continue to improve over the next few months.

\*Treatment is conducted by certified doctor.
