

What is Exilis Ultra 360?

As we age, the structure of the skin begins to break down. The skin loses its firmness and elasticity. This can result making you look older and tired. Rediscover more defined facial contours, eyes, jawline and chin contours with non-surgical skin firming Exilis Ultra 360 that helps in getting your skin toned and tightened.

Exilis Ultra 360 is a non-invasive, no downtime skin tightening treatment that will enhance your appearance if you are seeing signs of ageing such as fine lines, wrinkles and unwanted fats on the face and body. It uses a device that combines radiofrequency and ultrasound technology to tighten loose skin and get rid of fat without the need for numbing cream.

Exilis Ultra 360 delivers both focused continuous monopolar RF technology and ultrasound energy to target common areas such as face and body including the eyes, chin, jaw, décolleté, arms, back, abdomen, buttocks, inner and outer thighs,

ankles, elbows, and knees to boost collagen and elastin production, tightened slackened skin and destroy fat cells - an ideal non-surgical face lift for those who are looking to tighten loose skin.

How Does It Work?

The treatment starts off with gel applied over the treated area so that the applicator can move smoothly over the skin at a temperature set at 41- 43 degrees. The device is designed to keep the skin surface cool while delivering uniform heat energy to the deeper skin layers.

During an Exilis Ultra 360 session, you will feel a sensation of heat as the RF waves target your deep skin tissue to melt away fat cells, tighten the elastin fibers, and stimulate collagen production. The Exilis Ultra 360 device has a built-in cooling mechanism that will keep this heat from becoming unbearable. Most patients find Exilis Ultra 360 to be comfortable, with the heat sensation described as a “hot stone massage.”

ULTRA 360 TECHNOLOGY

Exilis Ultra 360 is the only skin tightening treatment that uses both ultrasound and radio frequency to target different layers of the skin, allowing more transmission of energy and greater conductivity of the heat to the target area. This heat shrinks the fat cells as well as stimulate new collagen production and tightening the elastin fibers in the skin, delivering precise results, leading to smoother, slimmer, firmer skin, making it the ultimate all-in- one treatment.

Safety & Side Effects

ULTRA RESULT

The treatment is safe, clinically-proven, and FDA-approved. The heating and cooling features of the device combine to achieve optimal outcomes in comfort and pain-free. Results from Exilis Ultra 360 can typically be seen after at least 4 treatments.

ULTRA COMFORT

With Exilis Ultra 360, you can easily schedule your treatments over your lunch break and resume normal duties directly afterwards. There are rarely any side effects, but some patients may experience a mild redness that subsides 1-2 hours after the treatment.

ULTRA SAFE

At Prive Clinic, we carry only the original Exilis Ultra 360 system and products to prioritise on patients' safety. However, if you are pregnant, this treatment will not be suitable for you.

Important note:

The Ministry of Health of Singapore does not allow the publishing of before and after photographs and patient testimonials in advertising materials. If you visit our clinics for more information, we will be happy to show you more photographs and pictures of our patients.
