

## About

If nature bestowed unsightly or awkwardly-situated moles, there are safe and effective procedures to help. Either a laser treatment or surgery will reveal true beauty, free of excessive beauty spots!

## How it works

Different types of moles (raised or flat) will require different methods. They include excision (cutting) with stitches or using laser. A consultation with the doctor will be recommended to examine which treatment method suits best.

\*Conducted by a certified doctor.

**Important note:**

The Ministry of Health of Singapore does not allow the publishing of before and after photographs and patient testimonials in advertising materials. If you visit our clinics for more information, we will be happy to show you more photographs and pictures of our patients.
