

What is Thermage CPT?

Thermage CPT (Comfort Pulsed Technology) is a non-surgical, non-invasive FDA-approved treatment that enhances contours and your youth with no downtime. Thermage CPT with the patented mono-polar capacitive radiofrequency technology are designed to deliver heat uniformly into the deep skin layers to kick start the natural renewal process of collagen. This results in skin tightening and a well-defined three-dimensional feature. The Thermage procedure can be done on the eyes, face, neck and body.

How Does It Work?

Thermage uses radio frequency technology to heat the deep, collagen rich layers of your skin. The heat helps remodel existing collagen and produce new collagen, which improves the smoothness and texture of the skin's surface. By heating the innermost layers of skin, Thermage is the most effective at renewing collagen, which results in smooth, sleek skin and an overall younger looking appear. Thermage includes patented Comfort Pulse Technology - gentle vibrations and interspersed cooling that make your Thermage treatment even more comfortable.

Each time the treatment device touches your skin, you'll feel a brief cooling sensation, followed by a deep but brief heating sensation, followed by another cooling sensation. The heating sensation is a sign that the deep layers of your skin are reaching effective temperatures for collagen remodeling. Comfort levels vary from person to person. Our team of professionals at Privé Clinic will take measures to make your experience as pleasant as possible.

Most patients require only one treatment, but it will also depend on the degree of skin laxity, as well as the individual's biological response to radiofrequency energy and collagen-building process. Results after a single session can last up to a year. As skin continues to age, future touch-up treatments can help patients keep pace with the body's natural ageing process.

Safety & Side Effects

Thermage first pioneered the non-invasive treatment of wrinkles using radiofrequency energy over ten years ago, and to date physicians in over 2500 practices and 80 countries have treated patients. That's more than 1 million treatments for women and men of all ethnicities, each with their own reasons for wanting to look and feel younger.

At Prive Clinic, we carry only the original Thermage CPT system and products to prioritise on patients' safety. Attached Certificate of Authenticity.

*Treatment is conducted by a certified doctor.

Important note:

The Ministry of Health of Singapore does not allow the publishing of before and after photographs and patient testimonials in advertising materials. If you visit our clinics for more information, we will be happy to show you more photographs and pictures of our patients.
