

## Dr Karen Soh

Medical Director Laser Clinics Asia  
Clinic Director Palais Renaissance

Dr Karen Soh graduated as a Raffles Top Scholar before going on to obtain a Bachelor of Medicine from National University of Singapore in 1997. She has received training in surgery, intensive care, obstetrics, gynaecology, ophthalmology and anesthesia. Dr Soh spent a year in Philadelphia, USA, where she developed an interest in anti-ageing medicine and received her training and certification from various institutions. Her interest in aesthetics was sparked off by her desire to help everyone, young and old, look and feel their best at every stage of their lives. Dr Soh is trained in Dermal and Hair Fillers, Non-Surgical Facelift, Anti-Ageing Treatments, Skin Resurfacing, Lasers, Light therapies, and a variety of minimally invasive Body Enhancement and Body Contouring Treatments. She attends seminars and trainings by international experts both locally and overseas, on a regular basis to stay at the forefront of the newest aesthetics technologies.

Dr Soh is an avid wine, jewellery and art collector who also enjoys scuba diving. She believes in living life to the fullest. Besides being a devoted mother of four lovely children (and makes it a point to cook for her family), she also serves on the committee of the Association for Women Doctors Singapore (AWDS) and spends time volunteering at nursing homes.
